Nguyen Quang Huy

Backend Developer (Java)
0819012251 | nquanghuycv@gmail.com| Ha Noi | https://github.com/HuyBeros

SUMMARY

Final-year Software Engineering student at Hanoi University of Industry (HaUI), awarded an Academic Excellence Scholarship. Hands-on experience with Java, Spring Boot, Quarkus, and PostgreSQL. Seeking a Backend Developer Internship to contribute to real-world projects and build a long-term career in backend development.

SKILLS

Programming Languages	Java (Core), C++, Python, C#
Backend	Spring Boot,Quarkus, Microservices, RESTful APIs, API Gateway, Eureka Server, JWT
Database	SQL, PostgreSQL, MySQL, Redis, Flyway
Messaging / DevOps	RabbitMQ, Docker, Docker Compose
Testing / Security	JUnit, Postman, Spring Security, OAuth2
Other	SOLID, Design Patterns, .NET, ASP.NET, Android (Java, Android Studio, XML),English(base)

PROJECTS

PhoneZone – Website Ecommerce *[04/2026 – 11/2026]*

FullStack Developer | Personal project

A full-stack e-commerce platform for smartphones, tablets, and repair services, supporting customer shopping workflows and store administration.

- Built REST API endpoints and designed 11 PostgreSQL tables.
- Implemented JWT authentication, role-based access control, and bcrypt password hashing.
- Developed checkout, inventory, coupon, and loyalty workflows with transactional consistency.
- Integrated Redis caching with TTL, cache invalidation, and database fallback.
- Built a responsive React storefront and admin dashboard.
- Configured Docker deployment on Render, Neon PostgreSQL, and automated checks with GitHub Actions.

Live demo: https://phonezone-app.onrender.com/

FBookShop – Website Ecommerce *[09/2025 – 11/2025]*

Backend Developer| Personal project

A bookstore management platform built with Spring Boot microservices.

- Developed 3 backend services: Payment, Bank, and Catalog.
- Built catalog APIs for book CRUD, search, category filtering, and inventory updates.
- Integrated VNPay with HMAC-SHA512 request signing and payment callbacks to update gift order status.
- Implemented bank discount APIs with in-memory caching and database refresh to reduce repeated queries.
